User Note #1

In validating the data files for the Office of the Secretary of Defense, Defense Contact Action Data System (DCADS) Master File for Fiscal Years 1986, 1987, and 1988, NARA Job Number NN3-330-94-004, Vivela Green and I discovered several discrepancies between the electronic records and the documentation for all three master files. On 14 February 1997, I spoke with Mr. Raymond D. Morris from the Office of the Secretary of Defense. He offered some explanations for the discrepancies.

The Consulting Services Contract (CSLT) field in many records in each file contained the value, 0. This value is not listed as an acceptable value for this field. Mr. Morris said that the records with this value were probably records that recorded information from DD Form 1057's rather than from DD Form 350's. Form 1057 is used for recording monthly summary information about contracting actions of less than \$25,000.00. Form DD 1057 does not record information about whether or not the contract was for consulting services. These records contain, 0000000000, in the IDKEY field. I checked the number of records in the master file for FY 1986 where the IDKEY was 0000000000. There were exactly the same number of records with 0000000000 in the IDKEY as there were with 0 in the CSLT field.

The Women Owned Small Business (FEMBUS) field in many records in each file contained the value, 0. This value is not listed as an acceptable value for this field. Mr. Morris said that the records with this value were probably records that recorded information from DD Form 1057's and from DD Form 350's where Part D did not have to be filled out because of values in previous sections of DD Form 350. I spot checked the values found in other fields that record information from DD Form 350, Part D and found that this is likely the case. For example, the number of records where LSA (another field in Part D of DD Form 350) contains a 0 is exactly the same as the number of records where FEMBUS contains a 0.

The documentation indicates that the SYSKEY field is four columns long and the valid codes are those found in Section II of the Department of Defense Procurement Coding Manual, Volume 1 Commodities and Services Reported on DD Form 350. These codes are three columns and contain all letters or 000. During validation Vivela Green and I found four character codes all beginning with a number. Mr. Morris explained that the first column of this field contains a numeric code for the branch of service followed by the three character code listed in the manual. The codes for the first column are the same as the codes used for the DEPT field.

There was one discrepancy that was limited to the master file for fiscal year 1988. The RANGE field is supposed to be a two column field. The valid codes listed in the documentation for this field are only one character. AERIC validation indicated that there are 2902 records in the fiscal year 1988 file with I1 in the field and 2345 records with I2 in the field. Mr. Morris explained that beginning in fiscal year 1988 the reporting requirement for this field was changed slightly. The value, I, represents contract actions with a dollar value between \$2,000,000 and \$4,999,999. To meet the new reporting requirements the DCADS staff began recording contract actions with a dollar value between \$2,000,000 and \$2,999,999 as I1 and contract actions with a dollar value between \$3,000,000 and \$4,999,999 as I2. This coding scheme is reflected in the documentation for the master file for fiscal year 1989.

MEMORANDUM FOR SECRETARY OF DEFENSE RECORDS ADMINISTRATOR (WHS/C&D/RMD)
(ATTENTION: MR. BOSWORTH)

SUBJECT: Defense Contract Action Data System (DCADS) Files

This memorandum is to request disposition of the DCADS data for fiscal years (FYs) 1986 through 1988 to the National Archives and Records Administration. In addition to the three magnetic tapes, the attached documentation is described below:

TAB A

Tab A is a record format that provides the physical description of the data and provides additional information to aid one in the understanding of the data.

TAB B

Tab B is a copy of the DD Form 350, "Individual Contracting Action Report (over \$25,000)" dated May 1985. This form was used to collect the DCADS data for FYs 1986 through 1988.

TAB C

Tab C is a copy of the DD Form 1057, "Monthly Procurement Summary of Actions \$25,000 or Less" dated October 1985. This form explains why some of the fields are blank where coded information would otherwise be expected. The IDKEY in the data records for the DD Form 1057 data contains all zeroes.

TAB D

Tab D contains copies of the Department of Defense (DoD) publication entitled DoD Defense Acquisition Management Data System Purchasing Offices List (MN01) for FYs 1986 through 1988. These manuals contain all DoD purchasing offices that may have reported data into the DCADS during these years.

TAB E

Tab E contains copies of the DoD publication entitled DoD Procurement Coding Manual; Volume 1, Commodities and Services Reported on DD Form 350 (MN02) for FYs 1986 through 1988. These were developed for use by

Army, Navy, Air Force, Defense Logistics Agency, and other DoD personnel who were responsible for preparing, coding, editing, or machine processing the DD Form 350 for the FYs in question. Specifically, the manuals pertain to the coding of the Federal Supply Classification or Service Code, System or Equipment Code, and DoD Claimant Program Number Fields of the DD Form 350.

TAB F

Tab F contains copies of the DIOR publications entitled DoD Defense Acquisition Management Data System Code Translation Manual (MNO4) for FYs 1987 and 1988. These manuals are provided to help understand the meaning of codes pertaining to the various fields of the DD Form 350 records for they may have changed in FYs 1987 and 1988. Additionally, the manuals will identify other manuals and/or regulations, such as the appropriate sections of the DoD Federal Acquisition Regulation Supplement which may aid one in the understanding of the data. A copy of the manual for FY 1986 is no longer available, however, there were no significant changes between FYs 1986 and 1987.

If you have any questions concerning these reports, please contact me at (703) 604-4572.

Section I
FEDERAL SUPPLY CLASS
OR SERVICE CODES
(Item B8A)

SECTION I
FEDERAL SUPPLY CLASS OR SERVICE CODES
(Item B8A)

General

A four-digit code shall be entered in Item B8A for every procurement action reported on DD Form 350. Only one code number should be entered. If more than one code is applicable, enter the code which describes the predominant product or service procured (see also DoD FAR Supplement 4.671-5(b)(8)(i)).

This section is divided into three parts: Research, development, test, and evaluation (RDT&E) codes are contained in Part A; other services and construction codes are in Part B; and supply and equipment codes are in Part C.

RDT&E

If the action is for research, development, test, or evaluation, enter a code from Part A of this section. (RDT&E is defined in FAR 35.001.) Do *not* assign an RDT&E code to housekeeping services or supplies purchased in support of "in-house" research or development work; such services are coded in accordance with Part B of Section I and the supplies in accordance with Part C. Procurement personnel responsible for coding RDT&E actions should obtain sufficient information from requisitioning personnel to permit accurate classification in accordance with Part A.

Other Services and Construction

If the action is for other services and construction, enter a code from Part B of this section. This four-position code consists of a letter identifying one of 20 major categories and three numeric digits identifying a specific service within each category.

Supplies and Equipment

If the action is for supplies and equipment, enter a code from Part C of this section. The classifications used here are those contained in the H-2 series of cataloging handbooks, except for the items contained in Federal Supply Group (FSG) category 19, "Ships, Small Craft, Pontoons, & Floating Docks."

PART A

Research, Development, Test, and Evaluation (RDT&E)

The RDT&E codes in Part A have been developed in accordance with guidelines established by the Federal Procurement Data Center. To ensure that the contract is for RDT&E, check the appropriation symbol. (Do not include housekeeping supplies or services in support of in-house RDT&E even though a RDT&E appropriation symbol is cited.)

Description and Use of Code

The RDT&E code is composed of two alphabetical and two numeric digits. The first position is always the letter "A" to identify RDT&E; the second position is a letter from "A" to "Z", used to identify the major category; the third digit is a number from "0" to "9", used to identify a subdivision of the major category. The fourth digit is a number from "1" to "6", used to identify the type of RDT&E. This fourth digit should be *assigned by the contracting officer* in accordance with FAR 35.001 as follows:

<u>First Two Positions of Program Element</u>	<u>FAR 35.001</u>	<u>Fourth Digit of Item B8A Code on DD Form 350 To Be:</u>
61	(1)	1. Research
62	(2)	2. Exploratory Development
63	(3)	3. Advanced Development
64	(4)	4. Engineering Development
All Other	(5)	5. Operational Systems Development
65	(6)	6. Management & Support

When the program element number appears on the purchase document, the first two digits of this number determine the number to be used in the fourth position.

For Army procurements, the third digit of an Army budget activity code *beginning with 6* identifies the appropriate code for use in the fourth position. Code 5 will be entered in the fourth position for all Army budget activity codes beginning with a number other than 6.

When completing this item, the precise service being purchased shall be coded. For example, a contract for research on noise pollution for aircraft should be shown under category AH4*, "Environment, Noise Pollution," and not under aircraft.

PART B

OTHER SERVICES AND CONSTRUCTION

All services and construction work, except RDT&E work, should be coded in accordance with the codes listed in Part B. Each category has been assigned a four-position code for a specific type of service or construction. The code consists of a letter identifying one of 20 major categories and three numeric digits identifying a specific service within each category.

The 20 major categories are:

- E. Purchases of Structures & Facilities
- F. Natural Resources Management
- G. Social Services
- H. Quality Control, Testing, & Inspection Services
- J. Maintenance, Repair, & Rebuilding of Equipment
- K. Modification of Equipment
- L. Technical Representative Services
- M. Operation of Government-Owned Facility
- N. Installation of Equipment
- P. Salvage Services
- Q. Medical Services
- R. Professional, Technical, & Management Services
- S. Utilities & Housekeeping Services
- T. Photographic, Mapping, Printing, & Publication Services
- U. Training Services
- V. Transportation & Travel
- W. Lease or Rental of Equipment
- X. Lease or Rental of Facilities
- Y. Construction of Structures & Facilities
- Z. Maintenance, Repair, or Alteration of Real Property

Due to the diversified nature of the services being purchased by the Department of Defense, it is very often difficult to identify the appropriate service or construction code that applies to a procurement action. If the appropriate code for Item B8A cannot be easily determined, the procuring activity should select a code that best fits the description of the service involved and submit a copy of the DD Form 350 in question (with an exact description of the type of service or construction being procured) to:

Washington Headquarters Services
Directorate for Information Operations and Reports
1215 Jefferson Davis Highway, Suite 1204
Attn: PEID
Arlington, VA 22202-4302

This will serve as a basis for determining the need for the assignment of new codes or the revision of existing codes.

PART C

SUPPLIES AND EQUIPMENT

All supply and equipment items should be coded in accordance with the codes listed in Part C. Except for the items in Federal Supply Group (FSG) category 19, "Ships, Small Craft, Pontoons, & Floating Docks," the classifications used here are those contained in the H-2 series of cataloging handbooks, covering the Federal Supply Classification system and personnel should refer to these handbooks for a more complete description of the codes. In the case of ships, a more detailed code is provided here than is shown in the H-2 handbooks.

The FSG codes are provided below:

Section II
SYSTEM OR EQUIPMENT CODES
(Item B8C)

SECTION II
SYSTEM OR EQUIPMENT CODES
(Item B8C)

Purpose

The DD Form 350 codes in this section have been developed to facilitate an analysis of DOD procurement by major weapon system,* equipment, or item. Codes generally have been assigned to all production items for which annual programmed procurement is \$2 million or more. However, if an end item or a component identifiable to an end item cannot be identified by a specific code, a request for a code, together with the applicable DD Form 350, should be addressed to the appropriate organization specified in DoD FAR Supplement 4.671-4(d). Submission of the DD Form 350 will not be delayed pending resolution of the inquiry.

If a system or equipment code is not applicable to a DD Form 350 transaction, or if the system or equipment bears a security classification prohibiting unclassified disclosure of the code title in combination with other DD Form 350 items, the code "000" (three zeroes) shall be assigned.

Description and Use of Code

The code for Item B8C consists of three alphabetical positions. The first position identifies one of the following major categories of equipment:

A	Aircraft	F	Ammunition
B	Aircraft Engines	G	Electronics
C	Missiles and Rockets	H	Other Equipment
D	Vehicles	S	Ships
E	Weapons		

The second position identifies a subdivision of the major category, e.g., fighter aircraft, while the third position identifies the specific item, e.g., an F-111.

Normally, each system or equipment code includes all subsystems, components, repair parts, modifications, repairs, and related supplies and services (other than RDT&E and construction) which are procured specifically for the system or equipment. Exceptions to this rule are those instances where a specific equipment item or a major component has been assigned a separate code, e.g., J-52 Turbojet Aircraft Engines.

When a procurement is for components, parts, or services covering more than one system or equipment and 75 percent or more of the dollar amount is allocable to a single system or equipment, the code for that system or equipment shall be assigned. Otherwise, multi-system procurement shall not be assigned a specific code.

Each department should use only that part of Section II designated for its use, e.g., Part A for Army, Part B for Navy, and Part C for Air Force. The arrangement of systems or equipment by major category is as follows:

* The definition of weapons system as provided by the *DoD Dictionary of Weapons and Military Terms* is "An instrument of combat with all the related equipment, operating skills, and direct supporting facilities and services required to enable the instrument of combat to operate as a single unit of striking power."

1. Aircraft are arranged by design number within each basic mission symbol, e.g., A-4, A-5, A-6, F-4.
2. Aircraft engines are arranged by design number within type of engine.
3. Missiles and rockets are arranged by design number.
4. Air Force electronics and communications items are arranged numerically by system number.
5. All other categories are arranged alphabetically by key word or words and by caliber size.

If an aircraft, missile, or rocket reported on DD Form 350 does not have a mission symbol or letter prefix listed in this manual but does have a design number that is listed, the code applicable to that design number should be assigned. For example, an RB-52 aircraft would be assigned the code for a B-52. In addition, the series symbol for an item is not used, e.g., F-111 is used, rather than F-111A or F-111B.

Introduction

This manual contains all Department of Defense purchasing offices that may report data into the Defense Acquisition Management Data System (DAMDS). These purchasing offices are broken down into the five basic DoD reporting components: Army, Navy, Air Force, Defense Logistics Agency (DLA), and Office, Chief of Army Corps of Engineers (OCE). Within reporting component these purchasing offices are sorted by purchasing office key (POFKY).

All data fields are intended to be self-explanatory, with the exception of "DATEOFF". A date in this field indicates that the purchasing office is inactive, with the date representing the date of inactivation.
